Vertical Line Array Solution for Longer Rooms

DESCRIPTION

The **FF-V2.4 PXD** loudspeaker pairs use shaded line array technology with ribbon high frequency drivers to extend sound projection in longer rooms. Their frequency response (120 Hz – 20 kHz \pm 3 dB) is optimized for speech intelligibility and musical detail.

FF-V2.4 PXD loudspeaker pairs employ a stereo 100-watt per channel class D amplifier with pre-amp, DSP, Ethernet control, and Dante.

Adding an Innovox Flex-Companion Series powered sub-woofer will extend low frequency performance below 50Hz to deliver high impact full-range music program.

KEY FEATURES

- Made to match height of video display
