True Sound Engagement in Large Venues

DESCRIPTION

The **HLA-Stage Lip** is a companion loudspeaker specifically designed to work in conjunction with an HLA hybrid line array to better serve front row seats. It provides both enhanced articulation and helps to localize the apparent sound source with performers on stage.

A 6" ribbon HF driver and two 3.5 MF drivers are employed to match the clarity, detail and program level of other HLA loudspeakers. The enclosure's shallow depth allows easy integration into the architectural environment.

KEY FEATURES

- 25° or 50° Vertical Coverage Options
- Very thin Profile (2" deep)
- Front Row M/HF Fill Loudspeaker
- Can be used for Articulation extension

APPLICATIONS

- Churches
- Lecture Halls
- Presentation Spaces
- Performing Arts Centers
