Low Frequency Extension for Flex Synergy Compact

DESCRIPTION

Flex Companion 2 x 5 very compact sub-woofer has been developed to extend the low frequency response of Flex Synergy Compact and Compact D powered collaboration loudspeakers. It has a (-3dB) low frequency power response which extends below 50 Hz. This provides a solid foundation for high impact full-range music program.

Flex Companion sub-woofers are powered by an internal 200W Class D power amplifier. They use proprietary sub-woofer signal processing which is provided by the DSP in its associated Flex loudspeaker.

KEY FEATURES

- Made to complement Flex Synergy Compact loudspeakers
- Extends Low Frequency Response below 50 Hz
- Increases Maximum SPL while reducing Intermodulation Distortion

APPLICATIONS

- Architecturally Inconspicuous 2.1 Sound Upgrade

DESCRIPTIVE DATA

System Configuration:	Sealed enclosure with active equalization
Components & Loading:	(2) 5.5" long-excursion LF drivers
Enclosure Material:	MDF
Finish:	Black
Connectors:	3-pole Phoenix
Grille:	Painted Perforated Steel

NOMINAL DATA

Nominal Frequency Response:	48 – 200 Hz \pm 3 dB
Class D Amplifier Power:	200 W RMS
Maximum Long-Term Output:	106 dB
Peak Output:	112 dB
Nominal Coverage Angles:	Omnidirectional
Dimensions	Height: 18.00" / 457 mm
	Width: 10.50" / 267 mm
	Depth: 4.25" / 108 mm
Approximate Net Weight/pair:	16 lbs / 7.3kg
Approximate Shipping Weight/pair:	18lbs / 8.2 kg
